Our Fee Policy

INTERCAD is a 100% Offender-Pay entity. An intrinsic portion of the goals of the systems we have created, is offender change. Consequences drive change. Those include financial consequences.

To operate successfully, we have spent more than 2 research years focused on driving DOWN our cost of delivery, as did Henry Ford, when he REDUCED the price of the Model T, for 20 consecutive model years, while doubling the wages of his workers. We follow his lead.
